

# STEP THERAPY

Most medical conditions have many medication options. Although their clinical effectiveness may be similar, prices can vary widely. The Step Therapy program gives you the treatment you need, usually at a lower cost.

## HERE'S HOW IT WORKS:

With this program, you must try a Step 1 medication first, before a Step 2 medication may be covered. When you bring a prescription to your pharmacy, our system will automatically screen the medication for step therapy requirements. If your prior pharmacy claims show you have tried a Step 1 medication in the recent past, the Step 2 medication may be filled. If not, the pharmacist will contact your doctor to explain next steps.

We encourage you to discuss your treatment and medication options with your doctor. If you have questions about the Step Therapy program, call the toll-free ProAct Help Desk at [1-877-635-9545](tel:1-877-635-9545).

- The list is not all-inclusive and does not guarantee coverage. Coverage is subject to change and some medications may be excluded from coverage, for the most current information or if you have questions, please visit [www.proactrx.com](http://www.proactrx.com) or call the ProAct Help Desk at [1-877-635-9545](tel:1-877-635-9545).
